

WHITE LABEL EV CHARGING SOFTWARE

Your Brand, Front and Center On Every Charging Touchpoint.

EV Loader is a turnkey, fully customizable charge point management platform. Deploy a driver app, operator dashboard, and web portal under your own brand, on your own domain, with your own pricing and payouts.

[Create Your Branded App](#)

[View the Page](#)

Built on OCPP 1.6 and 2.0.1. Integrated with Google Maps, Plugshare, and ABRP. OCPI roaming via Hubeject and Gireve.

WHAT YOU GET

A complete platform, ready to brand.

Branded Platform Suite

Driver app, operator dashboard, web portal, and reliable cloud hosting. Your logo, colors, and domain across every screen.

Universal Hardware Support

Hardware agnostic, OCPP 1.6 and 2.0.1 compatible. Mix and match chargers from any manufacturer. No vendor lock in.

Flexible Payments

Connect Stripe, Viva Wallet, Worldline, and other regional providers. Funds route directly to your company bank account.

Developer APIs

Stream live charging data into your ERP, CRM, or billing stack. Custom integrations supported by our engineering team.

EV Roaming (OCPI)

List your stations on Hubeject, Gireve, and ChargeHub. Reach drivers across networks and unlock new revenue streams.

Smart Load Balancing

AI driven power distribution across your sites. Avoid grid upgrades and keep every session reliable, even at peak demand.

BUILT FOR

Operators running real charging networks.

Charge Point Operators

Manage multi-site networks from one branded dashboard.

Fleet Managers

Track vehicle charging, RFID, and reimbursements at scale.

Hotels and Hospitality

Offer guests branded charging with revenue sharing.

Property and Municipalities

Public, semi-public, and private sites under one platform.

Make your stations visible. Attract more drivers.

Listings on Google Maps, Plugshare, and ABRP, included by default.

[Learn More](#)

ONE PLATFORM

Every tool your EV network needs.

From smart charging rules to partner revenue splits, every operational lever sits in a single dashboard, ready to configure for your business.

Smart charging and load balancing

OCPP smart charging rules with dynamic load distribution to prevent grid overloads.

EV wallet and invoicing

Driver wallets, payment gateways, automated invoices, and full transaction history.

Reservation and queue management

Let drivers reserve slots in advance. Reduce wait times during peak hours.

Partner subscriptions and revenue sharing

Automated splits, custom service contracts, and partner portal access controls.

Custom workflows and reports

Tailor UI flows, build bespoke reports, and extend the platform to fit your operation.

Live analytics and automated reports

Real time dashboards, scheduled reports, and BI tools for every stakeholder.

Switching from another OCPP platform?

Our team migrates your network with zero downtime. User accounts, RFIDs, and session history are preserved.

Need custom ERP, CRM, or invoicing APIs?

Our engineering team takes on complex integrations. Talk to us about your specific stack and reporting needs.

Common questions, answered.

Q. What is white-label EV charging software?

A fully rebrandable platform you operate under your own identity. Every screen, app, and email shows your logo, colors, and domain.

Q. Will it work with my existing chargers?

Yes. EV Loader is built on OCPP, so it connects with chargers from virtually any manufacturer. Mix vendors freely.

Q. Can I run a network across multiple countries?

Yes. Multi-language UI, multi-currency billing, timezone aware scheduling, and OCPI / OICP roaming are built in.

Ready to launch your branded network?
